"Greenland... ice melt... accelerates every year" is another lie. Most years it loses only ~200 Gt of ice (= 0.6 mm sea-level/yr, = 2.2"/century), and in latest 2016-2017 glaciological season it actually GAINED ice.

Claim that "Rate of sea level rise is currently doubling every 7 years" is a lie. Actual rate of SLR hasn't changed significantly in 90 yrs. Trend is linear since 1920s & unaffected by CO2:

sealevel.info/MSL_global_thu...

Curbing fossil fuels to reduce SLR is superstition, not science.

Stick to creative fiction. This story is nonsense. The sea level claims are ridiculous. Did it ever occur to you to seek an alternative opinion? Cumulative anthropogenic sea level rise so far just 5cm (+/-4).

Dave Burton @ncdave4life · 29m

@ElizabethaRush probably has no science bkgnd, and can't understand graphs, like these:

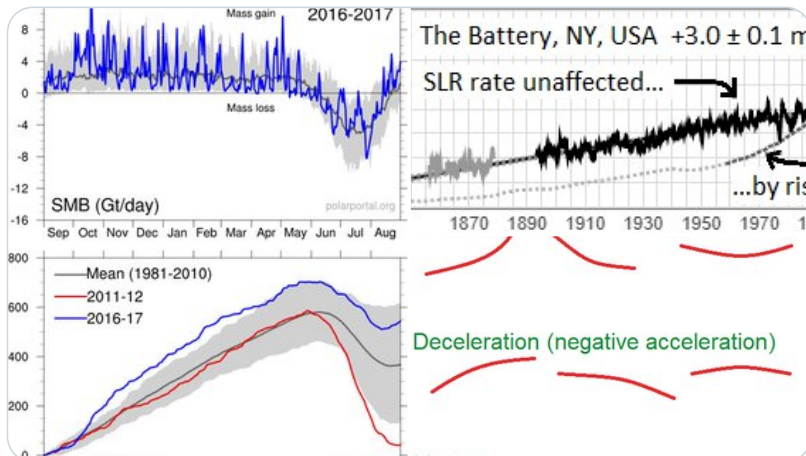

sealevel.info/MSL_graph.php?...

polarportal.dk/en/nyheder/ark...

Probably doesn't know what "acceleration" looks like in a graph:

sealevel.info/acceleration_p...

Only thing #Rising is #FakeNews level at the Grauniad.
